Plugin	Plugin Function Description	Credits per Action
Tutor AI	Assistant for interaction and answers, with teachers and students	3.14

Credit Usage - Datacurso AI Provider

Datacurso AI Provider	Plugin Function Description	Credits per Action
Generate Image	Generation of one image	26
Generate Text / Summary	Generate a text or a summary	1

Notes

- 1. Full course (with images):** In the tests carried out, the full course creation produced 4 sections or modules, 18 activities and 24 images, resulting in a usage for the prompt request of the planning plus the course creation, totalling 767 credits. The test was run letting the AI generate the required resources without setting any limits on image generation. *Credit usage may vary depending on the course planning and the limits set for image generation.*
- 2. Full course (without images):** In the tests carried out, the full course creation produced 4 sections or modules and 17 activities, resulting in a usage for the prompt request of the planning plus the course creation, totalling 120 credits. The test was run letting the AI generate the required resources, this time without generating images. *Credit usage may vary depending on the course planning.*
- 3. Quiz:** It is not generating an image when the option is selected.

4. **File:** It does not add images, but the usage comes from the configuration of how the document should be delivered and the page colours.
